

MARCH 20, 2023

ASUU strikes have become a common occurrence in many universities in Nigeria, disrupting academic activities and affecting the learning outcomes of students. The impact of these strikes on the academic performance of students has been a topic of concern among researchers, policymakers, and stakeholders in higher education. This report aims to investigate the effect of lecturer strikes on the academic performance of students in tertiary institutions. We will be taking a look at just a brief overview of the analysis which covers the following areas;

Policy implications and recommendations: Based on your analysis of the effects of lecturer strikes on the academic performance of students, you could make recommendations for policy changes or interventions that could help to mitigate these effects.

A donut chart illustrating the gender distribution of respondents. The chart is divided into two segments: a blue segment representing females and a grey segment representing males. The total number of respondents is 2800, displayed in the center. The female segment accounts for 1600 respondents (57.14%), and the male segment accounts for 1200 respondents (42.86%). A legend on the right identifies the colors: blue for Female and grey for Male.

Gender	Count	Percentage
Female	1600	57.14%
Male	1200	42.86%
Total	2800	

Subject	Average Score
Science	-0.175
Law	-0.20
Education	-0.20
Management Science	-0.195
Engineering	-0.22

Gender	Number of people who did not respond to the survey
Female	3.8
Male	3.8
